Performance Engineering

The 3040/3647 exposure systems form part of the extensive range of equipment offered by Heights.

The unit is clam shell in design and combines main exposure, light finishing and drying all in unit.

All the units are built to strict quality guide lines and are simply the only option for the large format plate making company where reliability, performance and quality engineering is a must.

The units carry with them accreditation for safety standards around the world and can be configured to suit the local power supplies.

Every unit is optimized for its performance and can be used with all types of solvent wash flexo plates and solvents, this makes the range ideal for the plate room using a variety of plate materials and thicknesses.
