

Heights 4260 IP Specification Sheet.

Digital Flexo Incremental Processor

The **4260 IP** has been designed to produce the highest quality digital flexo plates. The inline system is engineered to the highest standards to meet the requirements of continuous plate production on both analogue and digital solvent wash plates from all major suppliers.

The wash out system uses highly efficient, self cleaning rotary brushes and includes automatic replenishment and viscosity monitoring.

The unit is programmed via a Touch Screen PLC to ensure all parameters are stored and plate quality maintained to its maximum.

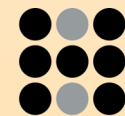

Excellent service access is provided for the brushes and all major components so maintaining the unit is made more efficient.

Features

- Touch Screen PLC operator interface
- Unique Brush Design
- Triple Axis Wash Out.
- High Speed Durability
- Robust Quality Engineering
- Hi-End Quality Components
